## GUIDING THEMES

- ★ Inquiry-based learning
- ★ Information communication technologies
- ★ Science in kindergarten and primary school
- ★ School cooperation
- ★ Learning landscapes

## PROGRAMME

### ★ Fair

Exhibition where all participants present their projects.

The fair is the key element of the festival.  
Further categories are:

### ★ Workshops

The participants develop teaching materials, recommendations and discuss important issues in education.

### ★ Master classes

Teaching methods and concepts are shared in small, informal presentations.

### ★ On-stage activities

Plenary presentations, performances, experimental lectures on a big stage.

### ★ Forum

Exhibition of public and private enterprises, organisations, foundations and publishers.

### ★ Social events

Opening ceremony, excursions, reception at the town hall and other events.

## CONFERENCE VENUE

Collegium Polonicum  
Ul. Kościuszki 1  
PL · 69-100 Słubice

## WHAT IS SCIENCE ON STAGE EUROPE (SONSEU)?

Launched in 2000, Science on Stage brings together science teachers from across Europe to share best practice in science teaching. A network of national steering committees in 27 European countries provides the interface to their science teaching communities. They organise national activities for teachers and select the teachers who represent each country at the European Science on Stage festivals. The festival, hosted every two years in a different country, is the culmination of national events in the participating countries. Following the festivals the ideas are cascaded throughout participating countries and participants have the opportunity to work together and develop their teaching skills.

## AIMS

To improve the quality of teaching by

- ★ enabling science teachers to exchange teaching concepts and experience
- ★ inspiring and enthusing science teachers
- ★ informing teachers about wider scientific research

The ultimate goal of Science on Stage is to improve science teaching and thus promote a scientifically literate population and encourage more schoolchildren to consider a career in science or engineering.
